EACH DAY IS CHALLENGING.
EACH DAY IS DIFFERENT.
EACH DAY IS REWARDING...

Lieutenant Jamal Gwathney, Physician, U.S. Public Health Service Commissioned Corps

DO YOU HAVE WHAT IT TAKES?

It's unlike any other health career you'll ever find. Put on the uniform of a U.S. Public Health Service (USPHS) Commissioned Corps officer, and you'll join an elite team of professionals who protect, promote, and improve the health and safety of our nation.

From within our ranks as a physician, nurse, dentist, pharmacist, therapist, mental health provider, and other health care professionals, you'll support state-of-the-art health care to underserved populations, guard Americans from emerging diseases and other biological threats, respond to public health emergencies in the U.S. and abroad, and much more.

As you consider your future health career, ask yourself if you have what it takes to be an officer in the USPHS Commissioned Corps. Find out more about USPHS, mentoring, and other career opportunities at www.usphs.gov.

MAKE THE U.S. PUBLIC HEALTH SERVICE COMMISSIONED CORPS THE HIGHLIGHT OF YOUR CAREER.

LETTER FROM THE CHAIR

On behalf of the HOSA, Inc. Board of Directors, it is my pleasure to welcome you to HOSA's 2020 Virtual Leadership Conference!

Reflecting on my last 28 years of service to HOSA, it is an honor to be a part of an organization with the core values of learning, leading, serving, and innovating. Despite the unprecedented challenges of 2020, the efforts of HOSA members, advisors, leaders, and staff who have banded together and continued to persevere are encouraging.

As a HOSA alumnus and current healthcare professional, it is a privilege to be a part of the pathway HOSA provides to our members on their way to becoming compassionate, caring, knowledgeable, and skilled healthcare workers. The world needs strong future health professionals and leaders now, more than ever!

Looking Towards Tomorrow, I want to challenge each of you to participate and take advantage of all the incredible opportunities HOSA offers. During this Virtual International Leadership Conference, you will have the opportunity to network with health professionals, alumni, and other HOSA members as a part of HOSA's exhibits, educational seminars and workshops. Many of you will also receive scholarships, compete, and be recognized for your community service. Congratulations to each one of you for your accomplishments this year!

Finally, recognition goes to the Executive Council for their creativity, dedication, passion, and leadership during one of the most challenging years. As a team, the officers have been visionary role models for our members. The HOSA, Inc. Executive Committee, Board Members, and HOSA Headquarters staff also serve—thanks for their tireless work and efforts in delivering a virtual conference in a matter of weeks.

In the coming months we may be faced with numerous challenges, but I have faith in our HOSA members and leaders and know we will continue to learn, lead, serve and innovate!

Jason E. Huff
Chair, HOSA, Inc. Board of Directors
LETTER FROM THE PRESIDENT

The Executive Council is excited to be welcoming over 7,000 delegates, advisors, and special guests to HOSA’s 43rd Annual International Leadership Conference!

HOSA-Future Health Professionals is thrilled to announce we are hosting the this year’s Virtual ILC with a full conference program including workshops, keynote speakers, the HOSA Exposition, and an opportunity to network with health professionals and other HOSA members. We encourage you to take advantage of the opportunities available as a part of this virtual platform.

Though we all wish we could meet in person, we are thankful to be able to offer a meaningful HOSA experience for you! We are committed to seeing our members grow as individuals and as future health professionals, even amidst difficult circumstances. We hope that adversity like this further prepares our members for the adversity they will face as future health professionals. More than ever, we strive to have our members lead by example for our communities with the knowledge of health they have acquired throughout the year.

Despite the challenges we have faced this year, resilience succeeded above all. We hope you can take all the lessons we have learned this year and on our HOSA journey as we all lead Towards Tomorrow.

We cannot wait to see you from June 24-27 for HOSA’s greatest Virtual International Leadership Conference, an experience you will never forget!

Most sincerely,

Vivian Do
HOSA President
As we began writing this letter, we realized how difficult it is to sum up all the emotions and feelings of this year into a single page. You have taught us so much, and we want to take this time to simply say thank you.

At the beginning of this year, each of us was embarking on a new journey. Whether that was starting college, a new job, or just entering a different stage of our lives, we were always guided by you, HOSA-Future Health Professionals. In moments of doubt, you reassured us of our abilities and passion for the healthcare profession. You offered us a mission to follow, passions to pursue, and values to champion. You shed light on our potential, inspiring us to be the best version of ourselves in every aspect of our academic, professional, and social circles.

Every conference, every meeting, and every HOSA event has brought each of us joy and fulfillment unlike any other. We have learned from every interaction and served the needs of others with compassion. Through our term, you taught us to stand up for what we believe in and to use our voice to create a positive influence. However, when confronted with diverse perspectives, you reminded us to keep an open mind.
As we were hit with the unexpected, you rose to the challenge and showed us resilience. Your radiant HOSA spirit inspired us to push through every obstacle. When we felt defeated, you encouraged us to embrace new ideas while serving HOSA members. You created a safe space for us and members all over the world when we needed it the most. In tough times, HOSA was our sanctuary, supporting us with an ever-growing network that we like to call our family, our home.

No amount of words could express our gratitude for you and this organization. Thank you for shaping who we are as people, leaders, and future health professionals. Thank you for letting us pay it forward and to give back to a community we all cherish so much. Thank you for starting a lifelong journey of service, leadership, and growth.

We promise to keep giving back, both to HOSA and the healthcare industry, and to never stop showing our appreciation for the lessons we have learned.

Your 2019-2020 HOSA Executive Council
COVID-19 Tribute

HOSA recognizes all of our Alumni members—the doctors, nurses, first-responders, and volunteers—who are on the front lines of the COVID-19 pandemic. We honor you.

In the Time of Corona

The death toll rises
in this war without bombs
this world-wide battle
ravaging nations
the enemy unseen
but clearly there
no bullets or artillery
can vanquish
the insidious foe
thousands upon thousands
struggle to breathe
COVID-19 attacking their lungs
slowly drowning them
mostly older generations succumb
to this grim reaper of 2020
doctors, nurses, first responders
all in the healthcare
and public safety fields
volunteers of all kinds
put their lives on the line
for those sick and dying
they are the soldiers doing battle
in this war to save lives
How do I repay them?
words, money, gifts
seem not enough
inconsequential compared
to their selfless sacrifice
I give them this poem
with my heartfelt respect
admiration and
incalculable gratitude
it’s all I can give
though not nearly enough

—Jan Graham, Auburn, New York

from across the world.
Vice Admiral (VADM) Jerome M. Adams, M.D., M.P.H., is the 20th Surgeon General of the United States. His mission as the “Nation’s Doctor” is to advance the health of the American people, and his motto is “better health through better partnerships.” He is committed to forging new partnerships and strengthen existing relationships with members from the business, faith, education, and public safety and national security communities.

As the Surgeon General, Dr. Adams holds the rank of Vice Admiral in the U.S. Public Health Service (USPHS) Commissioned Corps. In this capacity, he oversees the operations of more than 6,000 uniformed health officers who serve in nearly 800 locations around the world, promoting, protecting, and advancing the health and safety of our nation.

During his tenure, Dr. Adams has created several initiatives to tackle our nation’s most pressing health issues, including: the opioid epidemic, oral health, and the links between community health and both economic prosperity and national security. He is also a member of the President’s Coronavirus Task Force.

Earlier this year, he released Smoking Cessation: A Report of the Surgeon General, the 34th report on tobacco since the first Surgeon General’s report was released in 1964 and the first report on cessation in 30 years. The 2020 report documents proven strategies that help adults quit smoking, and makes it clear that one of the most important actions people can take to improve their health is to quit. This is true regardless of their age or how long they’ve been smoking.

Dr. Adams is focused on building a culture of health and prevention in all sectors, and as part of those efforts, he is compiling a report of available evidence and best practices documenting the connection between private sector investments and public policies. These connections promote healthy communities, and subsequent measures of business and community prosperity. The report will share the evidence, inspire future research and provide tools and resources for effective, efficient community health investments that produce results.

Dr. Adams received bachelor’s degrees in both biochemistry and psychology from the University of Maryland, Baltimore County, a master of public health degree from the University of California at Berkeley, and a medical degree from Indiana University School of Medicine. He has been a leader in numerous professional organizations, including the American Medical Association, the American Society of Anesthesiologists, the Indiana State Medical Association, and the Indiana Society of Anesthesiologists. Dr. Adams is also the former Health Commissioner of Indiana, where he led the State’s responses to Ebola, Zika, and to the largest HIV outbreak in the United States related to injection drug use.

Dr. Adams has pledged to lead with science, and facilitate locally led solutions to the nation’s most difficult health problems. He also feels his toughest, but most important job, is being a father to two teenage boys, Caden and Eli, daughter, Millie, and dog, Bella.
Barbara Pierce Bush
CEO and Co-Founder of Global Health Corps

Barbara Bush is CEO and co-founder of Global Health Corps (GHC), which mobilizes a global community of young leaders to build the movement for health equity. GHC was founded in 2009 by six twenty somethings who were challenged by Peter Piot at the aids2031 Young Leaders Summit to engage their generation in solving the world’s biggest health challenges. Bush and her co-founders were united by the belief that health is a human right and that their generation must build the world where this is realized. Since that time, GHC has placed nearly 1,000 young leaders on the front lines of health equity in Burundi, Uganda, Tanzania, Malawi, Rwanda, Zambia, and the United States, developing a cadre of creative, effective, and compassionate change makers.

Prior to GHC, Bush worked in educational programming at the Smithsonian Institution’s Cooper Hewitt, National Design Museum, where she supported design-thinking programs for high school students and faculty across the US. She has worked with Red Cross Children’s Hospital in South Africa and UNICEF in Botswana. Bush is a member of UNICEF’s Next Generation Steering Committee and the UN Global Entrepreneurs Council. She is a Draper Richards Foundation Social Entrepreneur, a World Economic Forum Young Global Shaper, and a fellow of the Echoing Green Foundation.

In 2011, Bush was named one of Glamour magazine's Women of the Year, in 2013 she was recognized as one of Newsweek’s Women of Impact, and in 2015 she was named to Fast Company’s Most Creative People in Business list. In October, 2017, Bush also released Sisters First, a New York Times best seller written with her twin sister and co-author, Jenna Hager. Bush graduated from Yale University with a degree in Humanities in 2004.

Fun fact: The daughter of the 43rd President is the keynote speaker for the 43rd International Leadership Conference.

In ten years, I believe we will see a dramatic improvement in the quality of life in the United States and around the world. And I know this will happen because of the result of an infusion of radical new leaders, like the leaders HOSA is building, who will change the world for the better.” — Barbara Bush, from HOSA’s 2020 VILC Keynote Address

Landon Stoker
HR Leader and Strategic Problem Solver, Honeywell
Former HOSA National Officer 2006-2007

Driven by a knowledge that each person and organization has greatness inside, Landon shows the way to unleash this greatness and find a rich, rewarding, and successful journey.

The richest and most rewarding part of Landon’s life is his wife Lindsay and his three children Zylinder (4), Saylee (2) and Anders (8 months). A lot of what Landon helps others learn, Lindsay and the kids have taught him.

In 2006-2007 Landon served as the HOSA Region One Vice President. Since that time, Landon has worked to transform lives and organizations by serving a two-year religious mission for The Church of Jesus Christ of Latter-day Saints, spending three years in the classroom helping high school students become their best selves, earning his MBA minoring in strategy and focusing on what makes companies thrive, and currently, helping business leaders thrive as HR Professionals.

Landon is always excited to help people and organizations find out who they are and how to become their best selves.

Activate Your Free Lifetime Alumni Membership Today!
Any student who is a HOSA member and graduating from high school or completing their postsecondary/collegiate program is eligible to become a HOSA Lifetime Alumni Member. The HOSA, Inc. Board of Directors has made this opportunity available FREE to help strengthen the organization and keep former members connected. Membership provides the following benefits:

- Create professional networking opportunities
- Stay current with news through the HOSA E-Magazine and the Alumni Newsletter
- Conduct workshops
- Serve as judges at state and national leadership conferences
- Serve as a mentor to a HOSA member
- Be involved in state and national activities where needs exist

Join today: hosa.org/alumni
Health with heart.

Yes, we serve millions of people in thousands of locations across the country. But what really matters is the size of our heart. Because every day, in every way, we are passionate about helping people on their path to better health.

*We are proud to support HOSA-Future Health Professionals.*
The HOSA-100 National Advisory Council serves as a vital champion of HOSA-Future Health Professionals. Council members provide HOSA with their professional expertise; their diverse knowledge of perspectives; their connections to local, state, national or international resources, or colleagues; their philanthropic support or other valued assistance; and promote HOSA-Future Health Professionals as the pathway for young people interested in the pursuit of careers in health beginning in middle or high school and continuing in postsecondary and collegiate institutions.

HOSA is proud to welcome two new members this year, Captain Thomas Pryor, U.S. Public Health Service, and Tina Lear, National Education Progression in Nursing!
HOSA Special Award Recognition

Honorary Life Membership

The recipient has made a significant contribution to the growth and improvement of the HOSA-Future Health Professionals or provided financial and/or other support to one or more special HOSA projects.

Janet Villarreal, Texas HOSA

As HOSA, Inc. Chairman of the largest Chartered Association, Texas, with 35,420 members and 903 chapters, Janet Villarreal is known for her visionary leadership in implementing a high-quality program that provide young people with the knowledge, experience and attitude to help them become health professionals. Janet was a Registered Radiologic Technologist, cross-trained in ultrasound and nuclear medicine, before she began her career with HOSA as a Health Science instructor in 1993, and later, the Executive Director of Texas HOSA in 2006. She has served on the HOSA, Inc. Board of Directors as the Western Region State Advisor, Secretary, Chair-Elect, and Chair. HOSA recognizes Janet for her passion, determination, and drive to ensure that all HOSA members are equipped with the tools and resources to be successful health professionals.

Educational Excellence Award

The recipient (educator or educational agency) has demonstrated extraordinary leadership in the educational community at an international or chartered association level. The recipient’s vision and support enhance HOSA’s ability to promote career opportunities in the health industry, thereby helping HOSA members achieve their educational goals.

Collie Wells, Alabama HOSA

Collie Wells began her education career in Family and Consumer Science Program, but she has become a treasured and valued member of Alabama's Health Science program and HOSA family. As Alabama’s Health Science administrator, Collie was an advocate for Health Science and HOSA on every front. Under Collie’s leadership, Alabama’s Health Science programs doubled and their HOSA membership grew exponentially. Collie Wells single-handedly changed the future of Health Science and HOSA in Alabama.
Above and Beyond Award
The recipient has exceeded the expectations of service to an international or chartered association.

Lynsey Singleton, Georgia HOSA

Lynsey Singleton is a big supporter and invaluable asset to Georgia HOSA. She serves as the CTSO Coordinator for the Georgia Department of Education and a member of the Georgia HOSA Board of Directors. Lynsey has dedicated countless hours to Georgia HOSA events, working in registration at Fall Rally and Fall Leadership, voting delegate meetings, and as the SLC Judge Coordinator in 2020. Thanks to her dedication, guidance, patience, and knowledge, Lynsey has gone Above and Beyond to help Georgia HOSA succeed and excel this past year.

HOSA Hero Award
The HOSA Hero Award recognizes accountable bystanders (HOSA members, alumni, and advisors) who take action and make a difference to save the lives of others.

Ramsey Miller, Oklahoma HOSA

Ramsey Miller, a former HOSA member and Vice President of her local HOSA Chapter at Yukon High School in Yukon, Oklahoma and graduate of the University of Oklahoma, currently works as a travel labor and delivery nurse. During a recent mission trip, Ramsey helped save the life of a mother and baby on the streets of Manila. The woman gave birth in the streets outside of their hotel, but the little girl was blue and lifeless, so Ramsey and her friend began working to get the baby breathing again. With makeshift tools from hotel security—a sewing string and children's scissors—Ramsey and her friend were able to cut and tie the cord and help the mother deliver the placenta—saving both the mother and baby’s lives.

Goodheart-Willcox Outstanding Service Award
This award recognizes three HOSA advisors for their exceptional service to HOSA at the local, state, and international levels. These advisors go “above and beyond” to help their students achieve their purpose.

Lema Gilliard
M. A. S. T. at Homestead, Florida HOSA

Melinda Lawson
Bob Jones High School
Alabama HOSA

Kate Mattern
Anaconda High School

We Are Future Health Professionals

Our Mission
The mission of HOSA is to empower HOSA-Future Health Professionals to become leaders in the global health community through education, collaboration, and experience.

Our Purpose
The purpose of HOSA-Future Health Professionals is to develop leadership and technical skill competencies through a program of motivation, awareness and recognition, which is an integral part of the Health Science Education instructional program.

We value LEARNING
We are committed to learning and becoming respected, knowledgeable and skilled health professionals. We will respect the experiences and contributions of our teachers, peers and patients and seek to learn from them.

We value LEADERSHIP
We will serve as role models in our academic program, profession and community. We will be ethical, accountable and trustworthy. We will use our influence to empower others to strive for excellence.

We value SERVICE
We are dedicated to serving others with compassion. We believe that individuals are important, and we will treat everyone with respect and care.

We value INNOVATION
We are dedicated to enriching the lives of others. We will continuously seek the knowledge and skills to address challenges and improve the health professions.

Our Creed
I recognize the universal need for quality, compassionate healthcare.

I understand the importance of academic excellence, skills training, and leadership development in my career pathway.

I believe through service to my community and to the world, I will make the best use of my knowledge and talents.

I accept the responsibility of a health professional and seek to find my place on a team equally committed to the well-being of others.

Therefore, I will dedicate myself to promoting health and advancing healthcare as a student, a leader, an educator, and a member of HOSA-Future Health Professionals.
2019–2020 Highlights
By exemplifying HOSA’s Mission and Core Values, our members continue to excel academically, serve their communities exceptionally, and pave the way for the future of health.

Top Career Interests:
- Surgeons
- Registered Nurses
- Pediatricians
- Biological Scientists
- Biomedical Engineers
- Physical Therapist

Top Majors Considering:
- Pre-Medicine
- Nursing
- Biological and Biomedical Science
- Biochemistry

Student Profiles:
- Average Grade: A-
- Average GPA: 3.9
- Average SAT: 1193
- Average ACT: 25

2019–2020 Membership Highlights
HOSA is celebrating 36 years of consecutive membership growth, reaching 249,113 members in 2019–20!

Largest Chartered Organization: Texas HOSA with 36,190 members
- Largest Secondary Chapter: Lambert High School
  Georgia HOSA
  605 members
- Largest PS/C Chapter: Meridian Community College
  Mississippi HOSA
  256 members
- Largest Middle School Chapter: Riverwatch Middle School
  Georgia HOSA
  276 members
- HOSA Cup Winner: China HOSA achieved a 377% membership increase

2019–2020 Community Service Highlights

**BARBARA JAMES SERVICE AWARD**
- 229,559 Hours volunteered with an economic impact of $5,837,685
- 2,719 Members participated by logging at least 30 Minutes of approved volunteer activity

**HOSA SERVICE PROJECT**
- 14,181 Hours volunteered with an economic impact of $360,623
- Total money raised for NPCF: $154,024

- 230 Chapters participated by volunteering at least 30 Minutes or by raising at least one dollar
- 1646 Hours
  - Most total volunteer hours from Central Arizona Valley Institute of Technology
  - Arizona HOSA clocked in with the highest combined volunteer hours

- $17,000
  - Largest donation from a single chapter was from East Valley Institute of Technology, also from Arizona

- $31,901
  - Largest combined state donation came from Oklahoma HOSA

A Field Guide to HOSA's Virtual Conference Platform

Communique is HOSA's virtual conference platform.

The platform will be the host for HOSA's General Sessions, Educational Seminars and Workshops, Exhibition Hall, HOSA's Recognition Hall, Competitive Events Headquarters and HOSA Headquarters.

Virtual Headquarters and Help Desk

Navigate the virtual conference from the HOSA Headquarters lobby. For questions regarding the Virtual Conference please call 1.877.249.1886 or email hosa@hosa.org.

Competitive Event Headquarters

All Competitive Event information, including the schedule, online testing, live events, round 2 postings, and FAQ are posted in the CE Headquarters.

For additional CE questions:

Call the CE Help line at 1.877.243.9027 or email priya@hosa.org

Call the Online Testing line at 1.877.204.2143 or email hosatesting@gmail.com
**Educational Seminars and Workshops**

To attend a workshop in the virtual environment, conference attendees will select a classroom (either Advisor or Student) and will find a content screen inside. A listing of workshops appears, and delegates select which title to view. Delegates are able to “attend” as many workshops as they wish. Workshops are available 24-hours daily except for the four live workshops. See the full list of workshops on pages 32–43.

**Exhibition Hall**

HOSA’s Exhibit is divided into two “halls” for easier navigation: Create Your Future and Be Inspired. Within Create Your Future, you will find your favorite educational institutions, associations, and military exhibits, while in Be Inspired, you can visit more associations, fundraisers, classroom, and merchandising exhibitors. Booths are identified by logo. Exhibitors are listed on pages 47–48.

Exhibits are open 24-hours; chat hours with exhibitors are:
- **Wednesday, June 24**: 12:00 – 4:00 PM CDT
- **Thursday, June 25**: 1:30 – 3:30 PM CDT and 5:00 – 7:00 PM CDT
- **Friday, June 26**: 9:00 AM – 1:00 PM CDT

**HOSA Hall of Recognition**

The Hall of Recognition features special recognition, honors, and awards such as the Barbara James Service Award, HOSA Happenings, HOSA Service Projects, Health Care Issues Exam, HOSA Scholarships, State Membership Awards, Special Honorary Awards, and Tributes.

**Gamification**

The HOSA Virtual ILC will utilize gamification to incentivize conference attendees to attend the general sessions, watch workshop videos, visit exhibitors, download content from workshops and exhibitors, visit the Recognition Hall, and much more. In the virtual conference, there will be a Leaderboard with a tab that will tell attendees how to obtain points. There will also be a place where attendees can see their points and the current leaders in point gathering! All delegates will want to be a part of the HOSA fun! Prizes will be awarded to those accumulating the most points.
Monday, June 22 (All times listed are CDT)

All Day  HOSA Competitive Events (as scheduled) [http://ilc.hosa.org/CE-Schedule](http://ilc.hosa.org/CE-Schedule)
8:00 AM – 1:00 PM  Executive Council Candidate Exam
1:00 – 3:00 PM  State Advisors Meeting
3:00 – 5:00 PM  Nominating Committee Meeting
5:00 PM  Executive Council Candidate Interview Schedule Posted

Tuesday, June 23

All Day  HOSA Competitive Events (as scheduled) [http://ilc.hosa.org/CE-Schedule](http://ilc.hosa.org/CE-Schedule)
10:00 AM – 3:30 PM  Executive Council Candidate Interviews
12:00 Noon – 2:00 PM  HOSA-100 National Advisory Council Meeting (By Invitation Only)
4:00 PM  Nominating Committee Report

Wednesday, June 24

All Day  HOSA Competitive Events (as scheduled) [http://ilc.hosa.org/CE-Schedule](http://ilc.hosa.org/CE-Schedule)
All Day  HOSA Exhibit Hall
All Day  Educational Seminars & Workshops
10:30 AM – 11:30 AM  Local and State Advisor Orientation
4:00 – 5:30 PM  Scholarship Recipient & Donor Networking Opportunity
7:00 PM  Opening Session
   •  Scholarship Recognition
   •  State Officer Team Tribute
   •  Tribute to 2020 Executive Council
   •  Tribute to Healthcare Professionals
   •  Honorary Life Member
   •  Special Message: U.S. Surgeon General Jerome Adams
   •  Keynote Speaker: Barbara Pierce Bush
11:30 PM  Committee Meetings (if needed)
   •  Rules and Arbitration
   •  Credentials and Tellers
Thursday, June 25

Are you considering a career in EMS?

The NAEMT Foundation works to strengthen and build the future of EMS.

The NAEMT Foundation:
• Awards scholarships
• Provides EMS career information
• Educates the public about EMS

For more information, visit the NAEMT Foundation at www.naemt.org in the “About NAEMT” section.
HOSA ILC 2020 Certificates
Will Be Available For Download

HOSA’s ILC Certificate is online and available for you to print with your name included on the certificate. You can access the certificate from ilc.hosa.org/certificate.

When you arrive at the page you will type your name and click submit. You’ll download your certificate as a custom Adobe PDF file.

EXPLORE A CAREER IN
PHYSICAL THERAPY!

Consistently named one of US News & World Report’s “Best Jobs”!

Physical therapists (PTs*) are MOVEMENT EXPERTS who diagnose and treat limitations to mobility that affect millions of people every day.

Physical therapist assistants (PTAs**) work under the direction and supervision of a physical therapist to help patients achieve their goals.

Visit APTA.org/Careers for more info!

*PTs earn a doctoral degree in as little as 3 years after college.

**PTAs earn an associate’s degree in as little as 2 years after high school.
Educational Seminars and Workshops

Learn from some of the Health Industry’s leading experts from the comfort of your home!

HOSA’s Educational Seminars and Workshops are available to view June 24–27.

There will be two LIVE workshops presented on Thursday, June 25 and Friday, June 26 each, highlighted in orange.

To access the Educational Seminars and Workshops, enter the “Classroom” on the virtual platform and select a workshop!

| Alcohol, Drug Addiction and Mental Health Services | Bruce Barcelo  
Program Coordinator  |
|---------------------------------------------------|----------------------|
| Don’t Blow It! Vape Prevention in Schools That Works | Renee Crichlow, MD, FAAFP  
Director of Advocacy and Policy, University of Minnesota, School of Medicine, Department of Family Medicine and Community Health |
| Ashley Bentley, Student Interest Strategist | Additional presenters include a panel of family medicine residents. |
| American Academy of Family Physicians | American Academy of Family Physicians  
University of Washington School of Medicine and Public Health |
| Finding Your Passion, Purpose, and Impact in Your Career | Tomoko Sairenji, MD, MS  
Assistant Professor, Department of Family Medicine |
<p>| Christopher Yang, Medical Student | Sarah Case, Medical Student |
| Aleksandr Robbins, Medical Student | Ashley Bentley, Student Interest Strategist |
| The Real and Raw Stories of Medical Students: The (Sometimes Bumpy) Path to Medicine and Finding a Career in Family Medicine | Join a panel of medical students to hear their unedited, real stories of how they made it to medical school, the highs and lows along the way, and what has inspired them to pursue a career in family medicine. Medical students will answer high school students’ biggest questions, like how they knew medicine was for them, the hardest parts of their journey, how they made it through, what they’ve learned about medical careers that they wish they knew in high school, and how to find a career that matches your drive, passion, and purpose. |</p>

<td>Be the Match</td>
<td>Benita Davis, Community Engagement Representative</td>
<td>For thousands of patients each year, they are in a race against time! Ethnicity is key and time is of the essence for these patients. There is a cure for blood cancers or blood diseases - a stem cell or marrow transplant - but first a genetic match must be found and that could be YOU. This session will cover the ins and outs of stem cell donation and why patients with a diverse background are less likely to find a match. You will also discover ways that your chapter can work with Be the Match to bring awareness to the need, educate your peers, and even host drives within your community to diversify the registry. Be the Match is the leading nonprofit organization focused on saving lives through stem cell or marrow donation, but still needs more committed donors to join their registry.</td>

Exploring Careers in Public Health

In the US, there is an impending shortage in public health occupations due to an aging workforce, increases in chronic illnesses, and limited capacity of education programs. As the US population continues to grow older, it is expected that the health care/public health sector will become one of the fastest growing industries between now and 2026, with approximately 3.5 million new jobs that will need to be filled by future leaders. While public health professionals serve such a critical role in population health (most recently COVID-19), many high school and college students are unfamiliar with this field of work. This workshop will introduce students to the field of public health and why it matters; the role of public health in local communities, government agencies and health care systems; and the various careers in public health such as epidemiologist, biostatistician, health educator, communications specialist, public health policy advisor, and others.

Financial Wellness Seminars

HOSA Students are “Made Ready for College.” With so much changing, it’s good to know you still have options when it comes to paying for college. Citizens Bank has made it a priority to develop quick and convenient ways to help you plan for college and learn about your financial aid options, without leaving the house. Access prerecorded finance college prep guides and learn how you can be financially well!

Policy, Workforce, and Career Considerations in Advance Care Planning

Follow the Coalition to Transform Advanced Care (C-TAC) as they examine current trends and discussions of advance care planning (in light of COVID-19), and the resulting career, workforce, and societal implications. The presentation will also cover key policies in advance care planning along with practical ways to have the conversation in your community.

Teaching in the New Normal

The recent COVID-19 pandemic reminded the nation just how vital schools really are, and of the importance of healthcare heroes. Health science teachers embraced the sudden shift to remote learning in the spring despite the stark challenges that they and their students faced. As schools struggle to reopen in the fall, we know we will be facing a new normal. Health science teachers must be ready to meet the learning needs of their students regardless of where and how that instruction is delivered. This workshop will address options for online learning, blended learning, and differentiated strategies for health science education.
### 4 Things That TIE into Life Development

Before participants get a job, it is important for them to have life skills and life development. People must learn positive habits, learn how to network and build relationships, empower themselves, and overcome obstacles. A necktie is a resource and life development tool that can help participants understand the importance of life development.

### Former HOSA Presidents

**LIVE**

**Friday, June 26, 8 AM CDT**

| Derrick Hayes
| Priya Rathakrishnan
| Path to Leadership |
| "enTIEtainer"
| Sarah Fleischmann |

Join two former HOSA Presidents as they share their HOSA journey from chapter member to Executive Council Member! They are excited to have you join them and to answer any questions you may have about leadership in HOSA-Future Health Professionals.

### Four Diamonds Mini-THON

**Anne Louise DeBord**

Associate Director

**Leigh Anna Hilbert**

Associate Director

**Four Diamonds Mini-THON: Funding Pediatric Cancer Research**

Four Diamonds Mini-THON is a student-led turnkey project that is hosted in close to 300 schools. Last year, more than 90,000 students participated and raised over 72 million dollars. This program augments classroom teaching. Students participate in experiential learning and apply classroom knowledge within their community by fundraising for pediatric cancer research. Childhood cancer is the leading cause of death by disease in the US. The national budget only provides 4% of its funding to pediatric cancer research. Families rely on programs like Four Diamonds Mini-THON to supplement funding for research. Students can be part of finding a cure through this hands-on program while also developing their leadership skills, critical thinking, and improving school culture.

### Goodheart-Willcox Publisher

**Linda Stanhope**

Health Science Specialist and Co-Author

**Kim Turnbull**

Co-Author and Health Science Instructor

**Med Terminology- Lab Techniques, Teams and Terms**

Look at different strategies to make "Medical Terminology" fun for both instructors and students. Strategies include hands-on labs, research skills, review games, case studies, quick quizzes and more.

### Goodheart-Willcox Publisher

**Mary McCarley**

Goodheart-Willcox National Content Specialist

**Incorporating Soft Skills into Your Lessons**

Join Mary McCarley, 2016 SHAPE America Southern District Teacher of the Year and Goodheart-Willcox Content Specialist, as she shares the value of incorporating soft skills into CTE courses and strategies for successful implementation. Teachers will leave with new soft skills activities and assessments for their teacher toolbox. In addition, all attendees will receive complimentary access to soft skills resources from Goodheart-Willcox.
| HOSA Alumni | William-Bernard Reid-Varley, MD, MPH  
HOSA Board of Directors  
NH VT HOSA Alumni Member | How to read a scientific paper
Although hundreds of basic science and clinical articles are published every year, not all are created equal. The ability both to understand and evaluate scientific/clinical papers are key skills for maintaining and improving oneself as a healthcare professional. In this workshop, designed primarily for post-secondary/collegiate and alumni members as well as healthcare professionals (although open to everyone), participants will learn the basics of approaching, reading, and analyzing papers published in professional scientific and clinical journals.

| HOSA Alumni | Aditya Vinjamuri  
2015-2016 National Postsecondary/Collegiate Vice President | How to Start a Postsecondary/Collegiate HOSA Chapter
Do you love being a HOSA member and don’t want it to end? Good news is...it doesn’t have to end! The Postsecondary/Collegiate Division provides students in two- and four-year institutions with the same opportunities you currently enjoy. Participants will have the opportunity to seek guidance and advice on how to start a post-secondary/collegiate level chapter efficiently and effectively as well as learn the basic requirements for affiliating a chapter with the college administration as well as state and national level HOSA associations.

| HOSA Alumni | Amit Sandhu  
2015-2016 National HOSA President |  
| HOSA Alumni | Julie Ray  
Founder | It’s Just My Nature
You are uniquely wired with temperaments (different from personalities) that guide how you see and interact with the world. The more you are TRUE to your NATURE, the more you THRIVE, have self-love, and confidence. You will leave this workshop feeling more empowered and validated for your unique way of showing up in the world; more understanding and accepting of yourself and others; more confident in your communication; and a general sense of compassion and love for all.

| HOSA Alumni | Mandy Nau  
Executive Director | Guess Who? With Health Professions Week
Health Professions Week is proud to present a virtual Guess Who? Panel!! Think you can tell the difference between an ND, a PA and an MD? And what the heck is an ND? We’re here to break down common misperceptions and myths and make it FUN! Health Professions Week (HPW) is a nationwide collaboration between today’s healthcare and education organizations designed to provide reliable, accessible resources to explore careers in the health professions. If you are considering a future in the health professions, HPW is your one-stop-shop to explore over 20 career options. Join the virtual session at HOSA and explore careers confidently!

HOSA and Beyond: HOSA and Medical Career Journeys

There are many ways to make a difference as a HOSA member and future health care professional! In this workshop, a former National HOSA president, a former National HOSA Vice-President, and a member of the National HOSA Inc., Board of Directors, will each share the story of their unique HOSA journeys and their experiences thus far on the road to becoming practicing physicians. Participants will leave the workshop with a wealth of both practical information and inspiration to lead and contribute in HOSA as they continue towards tomorrow!

International Joint Commission on Allied Health Personnel in Ophthalmology

An Eye-Opening Career – Ophthalmic Medical Technician

This stimulating workshop will shine the light on career aspects of the ophthalmic medical technicians, a little known, well-respected, and greatly in demand profession. Interactive methods will be used to demonstrate how a technician tests vision, and what else they can learn about a person’s health while examining the eye. The tools and techniques ophthalmic technicians use to assist the ophthalmologist in the clinic and surgical setting will also be highlighted. You will learn what it takes to become an ophthalmic medical technician, what it means to be one, and how to become a part of a life-long and rewarding career field.

Kaiser Permanente
University of Oklahoma Medical School

Here’s Your Details About Getting into Medical School!

Attend this session to get an overview of college choices, selection of undergraduate majors, details about the medical school admissions process, and insight into which medical schools to consider applying.

Leadership Initiatives

Live Virtual Diagnosis in the Developing World

Discover how technological innovation is transforming healthcare around the world. Participants will be transported to a hospital in Bauchi State Nigeria, where using a doctor in Nigeria as an extension of themselves, one pre-trained high school student will use Oculus Rift Goggles to examine and diagnose a patient who cannot afford medical care. This presentation is hosted by Leadership Initiatives in a partnership with Georgetown University. Each summer they host the world’s first internship program for high school students in advanced diagnostic training on the four leading causes of death in the developing world: malaria, typhoid fever, nutritional anemia, and acute respiratory infections (ARI). For their final project students diagnose a patient using Oculus Rift technology in sub-Saharan Africa with a doctor in real-time and recommend a treatment. Learn more at www.bethechangenow.org.

National Association of Parliamentarians

You’re Officially Invited to Membership!

The National Association of Parliamentarians (NAP) is excited to invite you to their interactive workshop on how membership in NAP can help you avoid chaotic and poorly run meetings. You will receive tips on preparing for and passing the Membership Exam and hear about the advantages of ParliPro for today’s youth/student member.
| National Geographic Learning/Cengage | Nicole Robinson  
Product Manager | Distance Learning with National Geographic Learning’s Health Science Simulations in MindTap  
Whether learning at home or in the classroom, students using National Geographic Learning’s MindTap for Health Science programs can experience live learning labs to engage in soft skills, ethical decision making, medical terminology, and procedures required for national certifications. See how digital content, virtual labs, simulations, and certification prep can provide a safe environment to prepare students for their careers in multiple health care disciplines. |

| National Consortium for Health Science Education | Nancy Allen  
Executive Director  
Lara Morris  
Chair | Being a Control Freak May Be Good for Your Health Science Program!  
Being a control freak is not always bad. Control what you can control! And meet a friend, National Consortium for Health Science Education (NCHSE)—the national authority for health science education! NCHSE believes a deliberate approach to deliver health science education includes essential components that lead to high quality programs. Analyze components you can control to make your program standout among the best! Focus on yourself, your students and your program—that’s how you take control. How can NCHSE support classroom teachers?  
1) Confirming Your Curriculum Framework (National Health Science Standards (NHSS); Four Course Framework; Scope and Sequence)  
2) Expanding Your Classroom Resources (Curriculum Enhancements; Newsletters, Publishers/Educational Resources Group)  
3) Implementing Assessments/Certifications (NCHSE End of Program; End of Course; Others)  
4) Integrating HOSA (Competitive Events Programs—NHHS Alignment)  
5) Building Networks and Partnerships (Health Science Educators Association (HSEA); Community Support, Work-Based Learning)  
6) Planning for Professional Development (Wednesday Webinars; National Health Science Conference) |
| New Prairie High School  
Play for Jake Foundation | Tonya Aerts  
HOSA Advisor & PLTW Biomedical Sciences Teacher  
Julie West-Schroeder  
Founder | Because We All Have A Heart - Making a Difference Following a Tragedy  
New Prairie High School HOSA, in northern Indiana, is focused on making a difference on the safety of students, athletes, and members of the community. #JAM is a campaign on sudden cardiac arrest awareness, CPR, and AED use in honor of two young men, Jake and Mark, who died from sudden cardiac arrest. Learn how you can evaluate current practices in your community and what you can do to implement an attitude of being rescue ready. |

Northeastern University’s Bouvé College of Health Sciences clinical professor Shan Mohammed MD, MPH discusses the importance of developing the skills needed to become a leader and changemaker in health sciences.

Communication and Listening

Ever wonder why you were given two ears and one mouth? The answer is: because it takes twice as much effort to listen! In this session, participants will learn about the mechanics of verbal and nonverbal communication. Considering the increase in virtual means of communicating, you will also explore the impact that technology has on the way you communicate with others. Join this interactive workshop that can help you become a better communicator at school, at work, and at home.

Which Educational and Career Path Fits Your Enneagram

Enneagrams are all the craze these days! Whether you are a 1 or a 9, you can have a successful future in healthcare. Come learn about education and career options that fit your personality with society’s global healthcare needs.

Your Wellness Story: Understanding Where You Are and How You Can Help Others

Hallway conversation: “Hey! How are you?” “Good. You?” “Good.” But are you really? As a society, we have become accustomed to offering a response without truly examining our personal wellbeing. In this session you will examine the six dimensions of health (physical, emotional, spiritual, intellectual, occupational, and social) and how those relate to Your Story of Wellness. Participants will discover the Wellness Wheel, can see where they are on the wheel, and can learn about the resources that are available to them. You will also explore college pathways that lead to careers assisting others on their wellness journeys.

J-Chess on the Campus!

Come join us for the Virtual Version of “J-Chess on the Campus!!” In this session you will learn about all things college prep: the admissions process, financial aid, scholarships, choosing a major, and what you can do now to prepare for college. All grade levels are welcome!

Art of Scenarios: Using Real-World Scenarios to Teach Employability Skills

Research continues to tell us that businesses of all kinds are prioritizing soft skills like problem solving, time management and work ethic over technical-job related skills. During this session, we will discuss ways to incorporate soft skill development into your everyday lessons to help students prepare to enter the modern workforce.
### Supporting Students with Mental Health Concerns

Mental health issues are growing in every classroom, at every level, in every school in America. Dealing with these mental health issues involves considering all parts of the classroom, including students, parents, and teachers. As a Certified Parent Peer Specialist, Teacher, Parent, and one who lives with anxiety and depression, the presenter has experience from all perspectives. This session will provide information and resources that consider all perspectives of mental health issues for helping those who are struggling. Participants will learn how to create a safe, inclusive, and stigma free classroom and school.

### Starla’s Hands-On Body Systems: Central Nervous System...‘Get Connected!’

Participants will build the components of the Central Nervous System in order to show communication within itself, with the body, and how choice making influences life’s outcomes. Participants will take their new nervous system with them! (You will leave with more ‘brains’ and more ‘nerve’ for competition!)

### Starla’s Hands-On Body Systems: Head injuries, Strokes, and Tumors!

Students will build cross-sections of brain out of clay to show anatomy and physiology of neurons, two types of strokes, tumors, and how Chronic Traumatic Encephalitis develops and affects an athlete’s life.

### My Unusual Path to Public Health

Some people know exactly what they want to do and how to get there. For others, the journey to a fulfilling career is not a straight path. Your well-intentioned, detailed career path may veer off course and lead to unexpected detours, but all is not lost. You can tap into the GPS of life and re-route yourself to still reach your destination. Hear from a doctorate-prepared nurse who will share their non-traditional career path, including commissioning in the U.S. Public Health Service. Learn how to find value in every experience and continue moving towards your career goals.
Utilizing Telehealth in your Practice: The 5 pillars of running a hybrid clinic

The world has shifted quickly this year in finding ways to deliver quality health care to patients. Telehealth services has skyrocketed across all professions and is being welcomed more openly by practitioners and clients. Moving forward, maintaining telehealth as an element of your clinical services will position you as a leader in the healthcare field. Natasha Wilch has been providing telehealth services in her multi-disciplinary clinic since 2017. She has experience ups, downs, wins, and losses. Her own journey with telehealth led her to being named Canada’s 2017 Entrepreneur of the year and she received the 2020 Excellence in Leadership Award from the Physiotherapy Association of B.C. In this workshop Natasha will provide you with an introduction to running a Hybrid Telehealth Clinic as well as the five pillars needed for success.
Credentialing and Careers in the Bioscience Industry

Careers in the bioscience industry include a diverse range of opportunities at multiple levels of employment. To address the industry's workforce needs, Florida has established a model program of study, making use of blended academic/CTE secondary programs and a statewide articulation agreement with postsecondary programs, as well as incorporating a nationally recognized industry credential (Biotechnician Assistant Credentialing Exam, or BACE). We invite you to learn about the development of the credentialing exam, the involvement of the national bioscience industry for its ongoing relevance and rigor, and candidate outcomes. We will also discuss careers in the bioscience industry.

Non-Clinical and Unique Clinical Careers in Medicine

When thinking about a career in medicine, one usually considers clinical work in a hospital or clinic. However, the opportunities are much more diverse. A clinical practice can also be combined with non-clinical work. The opportunities are as wild as your imagination - and can even include work at the South Pole! The range of non-clinical careers includes research, teaching, policy development, regulatory/government, administration, consulting, and many others. One can also combine their clinical expertise with exciting opportunities such as serving as the medical back-up on worldwide explorations! This workshop will begin with a short assessment of the advantages and disadvantages of these atypical positions, will then describe several of them, and will end with adequate time for discussion and Q&A. This is meant to be a very interactive session.

Digital Doctor: Using Telemedicine to Care for Patients During the COVID-19 pandemic

The COVID-19 pandemic rapidly pivoted the way patients were cared for in all aspects of healthcare. Telemedicine quickly became the "new normal" for patients who needed care in a time where keeping distance between patients and staff was a necessity. Learn how this resource was utilized to see patients at home and in the hospital, as well as used as how it was used as a resource to further medical education.

YouScience - Discover the Science of You!

YouScience and Precision Exams empower you to discover your natural talent with 11 fun brain games; validate your skills and knowledge with industry-recognized certifications; and stand out from the crowd with an impressive resume!
From tracking down and containing a medical outbreak to investigating a crime scene to solve a mystery, PLTW Biomedical Science students are taking on real-world challenges before they even graduate from high school. Working with the same tools used by professionals in hospitals and labs, students engage in compelling, hands-on activities and work together to find solutions to real problems that prepare them with the skills and experiences they will use in high school and for the rest of their lives. Virtual Conference Exhibition Halls

HOSAs Virtual Exhibit will be divided into 2 Halls.

Exhibit Hall 1: “Be Inspired”
includes 41 organizations and associations for fundraising, merchandising, classroom inspiration and professional development associations.

Exhibit Hall 2: “Create Your Future”
includes 41 organizations for education, colleges and universities, military recruitment, and professional development associations.

Browse the Virtual Exhibit Halls at your leisure or use the search tool to find a particular exhibitor.

Exhibit Booths are open all day
Wednesday, June 24 through Friday, June 27

Booths will feature “Live Chat” during the following hours:

Wednesday, June 24: 12:00 – 4:00 PM CDT
Thursday, June 25: 1:30 – 3:30 PM CDT
5:00 – 7:00 PM CDT
Friday, June 26: 9:00 AM - 1:00 PM CDT

MindTap is the online solution for CTE courses, including: a full, interactive eBook, annotation and study tools, video and simulations, certification prep, auto-graded assessment, data analytics, and more.

MindTap Learning Labs

Allow students to practice the most difficult concepts associated with their textbooks in a simulated, real-world environment. Developed to improve program quality and retention, Learning Labs prepare students for their health careers by increasing comprehension, critical thinking, and soft skills.

Cengage MindTap

The MindTap Pronunciation App allows students to record and receive instant feedback on their ability to pronounce key medical terms.
